

## HDI trimer DN-980BA

### ABOUT:

[DN-980BA](#) is a methyl methoxyisocyanate curing agent.

### Typical Physical Properties:

appearances	Clear Liquid
Active substance content	90%
Viscosityat25°C(mm <sup>2</sup> /s)	700±300
color value	≤1
disassociateHDI(Wt%)	≤0.5
NCO Content (%)	19.8±0.2
fluids	butyl acetate
solubility	DN-980BA is soluble in solvents such as ethyl acetate, butyl acetate enzyme, and ketones.

### Properties and Uses:

- High solubility in solvents, good compatibility with polyols
- High crosslink density
- Good resistance to yellowing and weathering, good flexibility

**Scope of application:**

Automobile refinishing paints, motorcycle paints wood paints, metal, plastic coatings, Heavy duty anticorrosive coatings

**Storage:**

Synthetic Leather Coating, DN-980BA is a highly active compound and should be stored out of direct sunlight, away from ignition sources, radiation, moisture, and in airtight containers.

**Safety:**

Handle with care, avoid contact with skin and eyes. For additional information, please refer to the Material Safety Data Sheet.

**Packaging:**

200KG/drum Please fasten the packaging cover as soon as possible after original packaging to prevent the mixing of other substances such as moisture and other substances that may affect the performance of the product. Do not inhale dust, avoid skin and mucous membrane contact. Smoking, eating and drinking are prohibited in the workplace. After work, shower and change clothes.

Store contaminated clothes separately and reuse them after washing.

Maintain good hygiene practices.
