

HDI water dispersion AsahiKasei WE50-100

ABOUT:

DURANATE™ WE50-100 by Asahi Kasei is a water dispersible hexamethylene diisocyanate (HDI). Acts as a curing agent for urethanes. Exhibits excellent color retention and outstanding performance. Provides good elasticity, excellent good chemical & abrasion resistance, good adhesion and drying properties. Possible applications could be coatings for automotive, architectural, industrial, consumer electronic and information technology. Other applications of DURANATE™ WE50-100 may include gravure, offset and screen inks.
